The Future of Music

Research Goal

Spotify has revolutionized the way we consume and listen to music. So how can they continue to influence and shape the future of music?

Audience

1

Artists

2

A&R's

3

Record Labels

Insights

The data from this report can:

Help an artist
select a successful
single

Help A&R's
decide which
talent to
discover & sign

Assist labels in
deciding allotment
of money for
promo

Aid in determining
beneficial features,
collaborations, etc.

Support artists
with a creative
strategy for
marketing

Give labels an
understanding of
how product will
perform

Quotes

"The internet has also changed the way A&R departments scout promising new artists. Data metrics and analytics now play a significant role in driving decisions. A&R reps are increasingly relying on data to measure an artists' potential more than traditional methods"

"All our business units must now leverage data and analytics in innovative ways to dig deeper than ever for new talent. The modern-day talent-spotter must have both an artistic ear and analytical eyes."

Jupyter Notebook

In [18]:

```
fig,ax = plt.subplots(figsize=(20,8))
ax.set_title('Music Trends over Time')
ax.plot(music_trends_by_year.year, music_trends_by_year.danceability, label = 'Danceability')
ax.plot(music_trends_by_year.year, music_trends_by_year.acousticness, label = 'Acousticness')
ax.plot(music_trends_by_year.year, music_trends_by_year.energy, label = 'Energy')
ax.plot(music_trends_by_year.year, music_trends_by_year.valence, label = 'Valence')
ax.plot(music_trends_by_year.year, music_trends_by_year.liveness, label = 'Liveness')
ax.plot(music_trends_by_year.year, music_trends_by_year.explicit, label = 'Explicit')
ax.legend()
plt.xlabel('Year')
plt.ylabel('Values')
plt.show()
```

A look at music trends of the over time based on musical elements

```
plt.figure(figsize=(12,8))
plt.title('Correlation Between Musical Features')
sns.heatmap(corr, annot=True)
```

Out[30]: <AxesSubplot:title={'center':'Correlation Between Musical Features'}>

A look at the correlation of music elements. Danceability, valence and energy are closely related for trending music.
